Copy & Pasting,  
Pilates and Netflix

## PROJECTS

### Sitter Now

*sitter-now.herokuapp.com*

Social app that allows parents and babysitters to connect through filtering sitters. Project implemented React.js, Node.js, MongoDB, Express, Auth0 and Bootstrap.

### Date-Builder

*intense-ravine-90857.herokuapp.com*

Automatically creates date ideas based from user's chosen theme. Results render from API calls from Yelp, Spotify and Weather. App is made using React.js, FirebaseDB, Node.js and Express.

### DateHub

*datehub.herokuapp.com*

Social media app that connects developers. Full implementation of user and friend models. Technologies used were: Node.js, Express and MongoDB.

## EXPERIENCE

### Westlake Financial Services

May 2013- May 2016

*Account manager for a nation-wide financial services company*

- Consulted businesses on their financial structure by designing and organizing new lending strategies.
- Educated and trained clients in the Westlake's patented Dealer Management Software platforms to maximize their proficiency in new industry technologies and profitability.
- Leading member of the company's first Sales Marketing Advanced Resource Training (SMART) Program; Continually achieved 100% of target goals by driving marketing while underwriting risk in individual loans.
- Expanded the South Texas region by analyzing demographics in undeveloped markets.

### Foundation for a Better Life

May 2012- May 2013

*Media intern for international nonprofit organization*

- Directly responsible for post-production and distribution of the 2012 outdoor advertising campaign.
- Spearheaded national call campaign which resulted in hundreds of donated broadcast space.
- Created Spanish and English social media strategies which led to increased online activity.
- Handled the updating and maintaining of the foundation's website.
